### Description

The ST-254 Table Saw is an established, robust, and smooth operating machine that is constructed largely from cast iron and the box section stand is made up of heavy gauge steel. The 254mm blade gives a cutting depth of up to 75mm at 90° & 60mm at 45° and adequately powered by a 2.2kW / 3hp - 240V 10-amp induction motor.

The cast iron table provides great strength and rigidity as well as a smooth user-friendly working surface. The micro adjustable rip fence is full length and cam locked solidly onto rails at the front and back of the table and can be used both sides of the blade. A mitre guide included slides in a T-slot grooves in the table on either side of the blade. Both the blade height and tilt controls have large handles that are conveniently located on front & side of the table saw.

The ST-254T 1500mm sliding table that's included in this package deal makes this machine even more versatile with its capabilities. The cast iron saw table also has solid cast iron table extension supports that are both mounted on the right side of the table and measures an attractive 1170 x 800mm in total. Dust can be removed via a 100mm dust port outlet at rear of machine and the saw guard when connected to a suitable high-volume extraction system.
